

ZS Sheetfed Conventional Series Ink

The ZS Sheetfed Inks have been formulated to exhibit unique body and flow properties. This results in vastly improved transfer and litho performance on modern high-speed sheetfed presses.

ZS Features

- + Excellent Dot Structure
- + Transfer/Color Stability
- + Excellent Water Balance
- + Work/Turn Characteristics
- + Low Mist
- + High Gloss
- + Stay Open
- + Selected coat-able bases available *
- + Cobalt Free

ZS Target Applications

- + High Speed Sheetfed

ZS Target Substrates

- + Coated Papers
- + Uncoated Papers

ZS Sheetfed Series

ZS series is formulated for low VOC with soy and linseed oil, along with multifunctional oil which polymerizes to a hard-durable film.

ZS Color Availability

The ZS Sheetfed Series inks contain clean, strong, transparent pigments designed for conventional systems. This allows the ZS Sheetfed Series to be hassle free on color matches achieving a wide color spectrum.

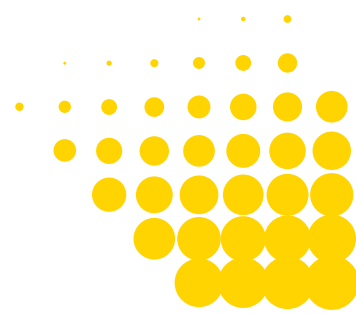

- + Full PANTONE® Color Lineup
- + Full Metallic Lineup
- + Full Fluorescent Lineup
